

**IFFCO-TOKIO GENERAL INSURANCE LIMITED IS THE OFFICIAL LAUNCH CLIENT
OF THE CROP RISK EXPERT SUITE ("CRES") IN INDIA**

SINGAPORE - MAY 15, 2017

Asia Risk Transfer Solutions ("ARTS") is proud to announce that IFFCO-Tokio General Insurance ("ITGI"), one of the largest general insurance companies in India, is the official launch client of ARTS' flagship agriculture risk system, the Crop Risk Expert Suite ("CRES"). Speaking after the announcement, Mr. Alex Chen, CEO of ARTS said, "We are delighted that ITGI have chosen CRES as their preferred risk analytics platform, and have been successfully using CRES since the start of this Kharif season. We have had the privilege of working closely with the excellent team at ITGI and look forward to many successful agriculture seasons ahead with them."

Ms. Soumya Gupta, Consultant at IFFCO-Tokio General Insurance Co Ltd, said, "As CRES is built on a cloud platform and has a shared database, it helps our team to collaborate on the projects and work together. With the real-time activity log, we are well updated about the latest progress. The workflow of the software is closely aligned to our underwriting workflow. Some important features include data visualizations to have a quick idea about the trend in yield data at a glance and flagging to highlight data inaccuracies along with the provision to edit data within the software. The flexible system gives us the autonomy to customize and experiment with our methodologies, summarize the results and present them in a user-friendly way."

Mr. Chen added, "We will continue to provide the best in technology and analytics for our clients in India and will further advance the capabilities of CRES in the months ahead."

CROP RISK EXPERT SUITE ("CRES")

CRES is a powerful and intuitive risk analytics platform that provides comprehensive risk insights for risk professionals to manage and grow their agriculture portfolio in an efficient and effective manner.

Optimised for huge datasets, CRES' powerful data processing engine turns massive agricultural production data into interactive visualisations and detailed risk insights within minutes. First-of-its-class, CRES has a plug-and-play modular design which can be readily upgraded and customised in accordance to an insurer's unique business needs. Designed with a risk professional's workflow in mind, CRES is highly intuitive and user-friendly with familiar spreadsheet interfaces and is fully compatible with MS Excel with seamless data import-export features.

CRES is now ready and operational in India and fully supports the requirements of the Pradhan Mantri Fasal Bima Yojana (PMFBY) programme.
